

August 2026 – March 2027

Dear Parent / Guardian of a Mathematics achiever

We are incredibly excited to introduce you to this opportunity for your child. AdMaths is proud of our Grade 12 learners who achieved 62 "A"s out of 162 candidates in the IEB Further Studies Mathematics Final Exam last year.

IEB Further Studies Mathematics

AdMaths (Pty) Ltd is a preferred service provider in Further Studies Mathematics (previously AP Maths), a subject offered by the Independent Examinations Board (IEB). This is an extra *subject* and not an extra *class* in Mathematics. The aim of the subject is to stimulate and enrich learners who are already performing well or have a great interest in Mathematics, by augmenting the school syllabus. We teach some concepts and theory ahead of its time. This makes learners sharper and they grasp quicker. Further Studies Mathematics puts Mathematics in perspective and widens horizons.

Do universities recommend Further Studies Mathematics?

The brochures of many South African universities give mentioning to “additional mathematics” as highly recommended for certain fields of study. Mathematics Higher Grade was examined in 2007 for the last time. Many students testify that CAPS Mathematics did not adequately prepare them for first-year mathematics at university. Although they obtained 80% or more at school, they struggle to adjust to university, especially in the first six months. Further Studies Mathematics (FSM) is nearly indispensable for fields like Engineering, B.Sc., B.Comm. and Actuarial Science. The subject ideally bridges the gap between matric and university. First-years are lost if they have not been exposed at school to old Mathematics Higher Grade topics like absolute values and linear programming. Nearly every IEB school in South Africa offers FSM, which is an indication of how high the benefits at university are esteemed.

Accredited qualification

We register (state school) Grade 12 learners with the IEB for the Further Studies Mathematics final examination, which occurs in October before the commencement of the Senior Certificate examination. A Further Studies Mathematics certificate improves the chances of university admission as it gives a testament to an aspiring student's independence, self-organisation and problem-solving skills.

Where does AdMaths fit in?

Additional Mathematics Higher Grade (“*AddMaths*”) was a departmental subject until 2007. It was appropriate to call our company “AdMaths”, which pronounces the same as the previous subject. Since 2005, AdMaths has been the largest Further Studies Mathematics supplier in South Africa and a household name. We are yearly the IEB's biggest FSM candidate centre. If a learner does AdMaths, the learner does Further Studies Mathematics through AdMaths (Pty) Ltd and writes his/her internal examinations with us up to the Grade 12 Trial Exam.

Which mathematics topics are taught?

The normal, scheduled contents cover Algebra, Calculus and Matrices. Furthermore, we offer optional exposure for Grade 11s and 12s to Graph Theory, Financial Mathematics, Modelling and Statistics. AdMaths accommodates the studious learner who wants to do more.

To obtain the accredited IEB certificate, a Further Studies Mathematics candidate only has to register for the *Standard* (Paper 1) option i.e. the taking of a 2-hour examination assessing Algebra and Calculus.

Candidates who wish to be assessed more widely, register for the *Extended* option and then write the 1-hour Paper 2 in addition to Paper 1. Paper 2 comprises the following three electives of which one must be answered: A. Matrices & Graph Theory B. Financial Mathematics & Modelling C. Statistics.

Study material and assessment

AdMaths' study material has been in development since 2005 and is regarded among the best of its kind in South Africa. It is made available quarterly (electronically) on the learner's profile and clients may order the hard copy at www.admathsretail.co.za. All clients are linked to pre-recorded video lectures. Learners write a test/examination every quarter at the nearest examination venue on a pre-determined day. Learners also submit informal assessment ("tutorials"). Grade 9s only submit tutorials.

What is the difference between the packages?

Bronze (self-study) learners have no live classes. They just have the study material and videos.

Silver = *Bronze* + access to live, weekly webinars in the *Zoho* portal.

Gold = *Bronze* + access to live, weekly in-person classes presented at a school by a facilitator.

The *Gold* and *Silver* classes occur once per week in term time and are 1½ hours in duration. For class times, visit www.admaths.co.za >> **CLASSES & COURSES** >> **PARTICIPATING SCHOOLS / WEBINARS**

Hard copies

Many learners utilise their devices to view the study material or they download it and print it themselves. Clients interested in our printed version of the study material order through *Retail*. There are three order rounds per year at www.admathsretail.co.za, in synchrony with the electronic access. Unfortunately, the full year's textbooks cannot be obtained at the beginning of the year. For the textbooks of each Grade (9-12), *Study Material* and *Solutions* are separate books per round.

Diamond (VIP package)

Diamond = *Bronze* + *Silver* + *Gold* + textbooks which are delivered three times per year as part of the package at no additional cost. *Diamond* clients sometimes use *Retail* for other products, but not for textbooks. *Diamond* clients have little administration throughout the year.

Registration for 2027

Apply at www.admaths.co.za >> **APPLY** by the latest **Tuesday 1 December 2026**.

First-time participants pay a registration fee of **R530**. We send an invoice with banking details and a due date of latest **Friday 4 December 2026**.

Find included a page with the monthly instalments per package. The yearly fee on (e.g.) the *Gold* package (in-person class access, textbooks excluded) is R7764, which is the sum of 12 payments of R647 each from 1 January to 1 December 2027.

The course commences once the study material of Term 1 becomes available on 15 December 2026, although the live schedule only starts in the week of **25-29 January 2027**.

Do you sign a contract with AdMaths? What happens at the end of a year?

Yes, you will receive an email from esign@admaths.co.za. You may cancel the contract by submitting a calendar month's notice at system@admaths.co.za. You may migrate between packages. There is an administrative fee of R220 payable to extend the contract for another year. We offer a R100 per month discount from the second sibling who participates.

Siblings in primary school may enrol for *AdJunior*. We also have a Grade 8 programme. Our *Further Studies Physics* and *Chemistry* programmes commence in the third quarter of Grade 10. *AdAccounting* (from Grade 10 3rd quarter) is our own initiative.

I look forward to hearing from you.

Kind regards

Jean Nico de Villiers
Principal
